

Chartis Hospital Cash Plan Puts Family First

As the sole breadwinner or provider for your family, one of your greatest responsibilities is to ensure financial stability for your loved ones in the long term. While most people tend to think that steady employment or a healthy bank balance is sufficient, this is in fact not the case. Being a parent and provider, you need to plan for the unexpected. For example, have you ever wondered what would happen to your family if you needed to be hospitalised for a long period of time? The resulting loss of steady income and support would leave your family unable to pay for daily necessities, living expenses, education, health care, etc. Indeed, this scenario has left many families bankrupt and unable to maintain their standard of living and preferred quality of life.

To protect families from this situation, Chartis, one of the world's leading insurance providers, has introduced the Hospital Cash Plan. With this policy, you and your immediate family (spouse and children) will be covered for up to R2500 a day from day one and up to 180 days per incident - if hospitalised due to accident or illness.

“At Chartis, we understand that when hospitalised for long periods of time you may need financial assistance,” explains Reinhard Franke, General Manager of Chartis South Africa. “This is why our policy has been carefully designed to provide you and your family with financial cover from day one, allowing you to rest and recover knowing that your family is still being provided for while you are in hospital.”

In today's unpredictable environment, insurance policies such as the Chartis Hospital Cash Plan have become more important than ever. Added to this, the increased cost of living, medical care, and education, have put increasing pressure on families to ensure that there is a steady source of income.

“Without a policy such as the Hospital Cash Plan in place, South African families can be left financially vulnerable,” adds Franke. “Yet by just making a simple decision, one can purchase world-class protection as well as peace of mind. This is not a medical aid, so the money can be used for whatever you and your family require.”
