

# Construction Solutions

The risks in the construction industry are as diverse as the businesses that serve it. Construction contractors confront complex, often large-scale risks from a project's start to finish. That's why the Construction Solutions unit of Chartis provides construction clients of all sizes with a spectrum of standard and specialty insurance products and services to address their simplest to most difficult exposures. Our ability to design innovative new coverages for their evolving risks enables our clients to pursue a course toward their goals.

## Full Spectrum of Solutions

Construction Solutions serves as a central point of access to offer commercial and residential contractors, general contractors, homebuilders, subcontractors, trade contractors, architects & engineers, wrap-ups, and project specific developments the full breadth of insurance solutions available through Chartis.

### Coverages

- Primary General Liability
- Commercial Umbrella Liability
- Environmental Liability
- Architects & Engineers Professional Liability
- Property Insurance
- Property Terrorism Insurance
- Workers' Compensation
- Accident & Health

## Construction Expertise From Underwriting to Claims

Construction Solutions brings a comprehensive approach to developing our clients' risk management programs—starting from underwriting, through loss control, through claims management. We bring decades of extensive industry experience and teams of construction-dedicated professionals to assist our clients in structuring the insurance programs they need; putting in place sound loss mitigation practices; and handling the smallest to the most intricate, large-scale claims. By offering construction clients the vast array of Chartis' resources, Construction Solutions can provide them with more seamless risk management programs that will help eliminate many of the gaps in coverages and inconsistency in services that often occur with using many, different carriers.
