175 WATER STREET, FLOOR 29
NEW YORK, N.Y., 10038

RALPH W. MUCERINO
CHIEF OPERATING OFFICER,
FOREIGN GENERAL INSURANCE, AIU HOLDINGS
PRESIDENT, GLOBAL MARINE AND ENERGY

April 20th, 2009

Dear Colleagues,

I am pleased to announce the appointment of Rob Kuchinski as President of the Global Energy Property Division. Rob is a seasoned executive who has played a key role within our organization for 9 years. Rob will repatriate to the United States from London and will be based in New York.

In his new position, Rob will be responsible for managing the global property book, and will report to me. Rob Rokicki will continue to have management responsibilities over the North American property book, reporting directly to Rob Kuchinski.

Rob has been in the property insurance business for 23 years, with most of that time specialized in the Energy sector in either engineering or underwriting positions. Rob joined Global Marine and Energy in April 2000, and has held a variety of positions within our team, including most recently Profit Center Manager for our on and off shore Energy operations in the UK/Ireland region. Prior to that, he was my Chief of Staff for Global Marine and Energy worldwide, and was also instrumental in building our staff of North American Energy Division Property staff in 2006.

Rob entered the insurance business as a Mechanical Engineer with Factory Mutual in 1986; prior to joining AIG, Rob worked at Hartford Steam Boiler in various engineering, underwriting, and management positions for 10 years. He holds a Bachelor's Degree in Mechanical Engineering from Rutgers University.

Rob exemplifies the spirit and strength of AIU Holdings. Please join me in congratulating him on this appointment.
